- **NON-FLAMMABLE FLAME PROJECTION**
- **TRIPLE ACTION FORMULA**
- **CONTAINS NO CFC'S OR OZONE DEPLETING SUBSTANCES**

Dare to compare our formulation! Zapper has the highest and most lethal insecticide package available today.

Contains .15% Tetramethrin which is a synthetic pyrethroid designed for instant knockdown on wasps & hornets - Paralysis and death to insects.

Contains .375% Permethrin which is a synthetic pyrethroid designed for instant kill on wasps & hornets. Also is a residual insecticide for killing wasps & hornets returning to the nest - Paralysis and death to insects.

Contains .75% Piperonyl Butoxide. This is a synergist, not an insecticide that makes both Tetramethrin and Permethrin more effective killing agents. Zapper is far superior than other wasp & hornet killers that don't contain Piperonyl Butoxide.

PRODUCT CODE: A296 PACKAGING: 12 - AEROSOL CANS
