Water activation dispenses special odor-combating and scale-dissolving agents. These agents go to work in the trap to prevent build up of a mineral scale matrix. This matrix would otherwise hold organic matter and become a source of odor. This kind of build-up, if not prevented, causes the urinal drain to become slow running and eventually to clog.

A blue color signal is dispensed with each flush as an indication that the unit is working to protect the urinal. A pleasing blue tint is left in the water and a light fresh scent freshens the rest room air.

The disposable plastic dispenser molds itself to urinals of all shapes and sizes. Uniquely bevelled ribs prevent splashback from the top of the screen.

WORKS AROUND THE CLOCK
 TO GUARANTEE PROBLEM-FREE URINALS

CAUTION:
 Keep Out of Reach of Children
 Do Not Take Internally

FIRST AID:
 EYES: Flush with water for 15 minutes. Seek medical attention..
 SKIN: Wash with soap and water. If irritated seek medical attention.
 INGESTION: Drink large amount of water, get immediate medical attention.

Contains 12 Urinal Units
 Net weight of each 3 3/4 OZ. (110 grams)
 Made in the USA

CONTAINS:		CAS#
Sodium Sulfate Anhydrous.....	7757-82-6	
Sodium Tetraborate Pentahydrate.....	12179-04-3	
Sodium Tallowate (Soap).....	61789-31-9	
Sodium Dodecylbenzene Sulfonate	25155-30-0	
Bacterial Mixture		
NFPA		HAZARD RATING:
