SUPERIOR SOLUTIONS

SWAT TEAM™

One of the biggest problems for outdoor electrical equipment is Fire Ants. Fire Ants are attracted to electricity and are known for eating through cable insulation on power lines. They are drawn to electrical power sources and may gather on metal conductors causing shorts in the lines, junction boxes, etc.

We have the solution!

Protect your equipment and employees with

SWAT TEAM Granular Fire Ant Killer.

PS304: 50 - 4 oz pouches per pail · PS3020: 12 - 20 oz Shaker Bottles

SWAT TEAM BENEFITS:

- **Highly Efficient Insect Killer. Extremely Deadly to Fire Ants, Roaches, Spiders, etc.**
- **Excellent Residual. Longest Known Residual Time in Soils of any Insecticide**
- **SWAT TEAM - Lower Cost Per Pouch and 3 Times the Volume Than Competitors**

SWAT TEAM VS. Chlorpyrifos Ant Killers

SAFETY -

SWAT TEAM - Uses Bifenthrin, a pyrethroid insecticide which is only slightly toxic to mammals and birds

Chlorpyrifos - Is a Cholinesterase inhibitor. Exposure to Chlorpyrifos will damage the nervous system and can also be poisonous or toxic to humans.

SWAT TEAM - Normal PPE

Chlorpyrifos - Requires Specific PPE

ENVIRONMENTAL -

SWAT TEAM - is Non-Leaching and not restricted in residential areas

Chlorpyrifos - Environmentally Hazardous Substance and is an organophosphate pesticide which are more acutely toxic to birds and mammals than pyrethroids.

SWAT TEAM - Zero toxicity to plants and is a biodegradable formula

COVERAGE - PER EPA LABELLINGS

SWAT TEAM - Coverage Rate is 4'x4' area

Chlorpyrifos - Coverage Rate is 1'x1' area.

Electrical transformers appear to be more attractive to ants during the cooler months. For best results treat in the fall or early spring.
